

INTERIOR LIGHTING

Fundamentals, Technology and Application

2019

Wout van Bommel

Contents

Part I FUNDAMENTALS	1
1 Visual Mechanism	1
1.1 Visual Sensation	2
1.2 Optics of the Eye	3
1.3 Retina and Photoreceptors	4
1.4 Spectral Sensitivity	8
1.4.1 Cones and Rods	8
1.4.2 Photopic and Scotopic Vision	9
1.5 Receptive Fields	11
1.6 Colour Vision	17
1.7 Pupillary Reflex	19
1.8 High-Level Vision	20
1.8.1 Perceptual Constancy	21
1.8.2 Maintaining Constancy	22
2 Colour	1
2.1 Perceived Colour	1
2.2 Colour Specification	2
2.2.1 CIE x-y Chromaticity Diagram	2
2.2.2 CIE u'-v' Chromaticity Diagram	10
2.2.3 Colour Spaces	11
2.3 Colour Appearance of White Light	13
2.3.1 Correlated Colour Temperature CCT	13
2.3.2 Distance from Blackbody Locus, D_{uv}	15
2.4 Dominant Wavelength and Excitation Purity	15
2.5 Colour Rendering	16
2.5.1 General Colour Rendering Index R_a	16
2.5.2 General Colour Fidelity Index, R_f	20
2.5.3 Gamut Index R_g	23
2.5.4 Colour Vector Graphics	26
2.5.5 Colour Discrimination	28
2.5.6 Surface-Colour Metamerism	29
2.6 Summary of Colour Metrics	31
3 Visual Performance	1
3.1 Visual Task	2
3.2 Threshold Visibility	4
3.2.1 Visual Acuity	5
3.2.2 Threshold Contrast	8
3.3 Supra-Threshold Visibility	10

3.3.1 Landolt-Ring Task	11
3.3.2 Search Task.....	16
3.3.3 Verification Task	18
3.3.4 Rea's Visual Performance Model	20
3.4 Disability Glare	23
3.5 Indirect Glare	26
3.5.1 Non-Self-Luminous Tasks	26
3.5.2 Self-Luminous Devices.....	28
3.6 Influence of Spectrum	29
3.6.1 Pupil Size	29
3.6.2 Visual Acuity	30
3.6.3 Equivalent Visual Efficiency Method.....	31
4 Visual Satisfaction	1
4.1 Spatial Brightness.....	2
4.1.1 Brightness-Luminance Relation.....	2
4.1.2 Influence of Spectrum.....	5
4.2 Room Appearance	8
4.2.1 Room Surface Illuminance and Luminance	8
4.2.2 Mean Room Surface Exitance, MRSE.....	15
4.2.3 Items for further Study.....	21
4.3 Directionality and Modelling	22
4.3.1 Flow of Lighting	23
4.3.2 Light Tubes.....	27
4.4 Discomfort Glare.....	29
4.4.1 Fundamental Approach.....	29
4.4.2 Unified Glare Rating, UGR	31
4.4.3 Overhead Glare.....	42
4.4.4 Indirect Glare	43
4.5 Light Colour Preference	44
5. Non-Visual Biological Mechanism.....	1
5.1 Circadian Rhythms	2
5.1.1 The Principle.....	2
5.1.2 Bodily Rhythms	5
5.1.3 Biological Clock).....	7
5.1.4 Chronotypes	7
5.1.5 Entrainment.....	8
5.1.6 Phase Shifting	9
5.2 Third Type of Photoreceptor	11
5.2.1 Photosensitive Retinal Ganglion Cells (pRGCs)	11
5.2.2 Retinal Neural Wiring.....	12
5.2.3 Spatial Distribution of pRGCs	13
5.2.4 Field of View	13
5.3 Pineal Gland and Adrenal Cortex.....	14
5.4 Direct Photobiological Effects	16

5.5 Spectral Sensitivity.....	17
5.5.1 Action Spectra.....	17
5.5.2 Spectral Sensitivity of Photopigments	23
5.5.3 Spectral Characterization of Lighting Installations.....	28
6 Light, Sleep, Alertness and Performance.....	1
6.1 Sleep.....	1
6.1.1 Sleep Mechanism.....	2
6.1.2 Sleep Measures	3
6.1.3 Daytime Light.....	3
6.2 Alertness and Performance.....	8
6.2.1 Alertness and Performance Measures	8
6.2.2 Daytime Light.....	9
6.3 Dynamic Daytime Lighting Scenario.....	14
7 Shift Work, Light, Sleep and Performance	1
7.1 Circadian Misalignment	1
7.2 Sleep, Alertness and Performance.....	3
7.2.1 Sleep	3
7.2.2 Alertness and Performance	4
7.3 Nighttime Lighting Strategies	7
7.3.1 Bright Light	7
7.3.2 Intermittent Bright Light.....	10
7.3.3 Short-Wavelength Depleted White Light.....	12
7.4 Dynamic Lighting Scenarios	15
8 Age Effects	1
8.1 Changes in the Visual and Circadian System.....	1
8.2 Age and Visual Effects of Light.....	3
8.2.1 Loss of lens elasticity.....	3
8.2.2 Reduced Pathway Signal.....	3
8.2.3 Increased Glare	7
8.2.4 Slower Dark Adaptation	8
8.2.5 Reduced Visual Performance.....	8
8.3 Age and Non-Visual Biological Effects of Light	10
8.3.1 Reduced Pathway Signal.....	10
8.3.2 Melatonin Concentration	10
8.3.3 Circadian Rhythm	11
8.3.4 Sleep and Alertness.....	11
8.2.5 Light-Dark Scenario	12
9 Therapeutic Effects	1
9.1 Chronotherapy.....	1
9.2 Disrupted Circadian Rhythms	2
9.3 Light Therapy.....	3
9.3.1 Depressions.....	3
9.3.2 Sleep Disorders.....	4
9.3.3 Alzheimer's Disease	4

9.3.4 Parkinson's Disease	6
9.3.5 ADHD Disorder	7
9.3.6 Eating Disorders	7
9.3.7 Healing in the Hospital	8
10 Hazardous Effects	1
10.1 Adverse Effects of Lamp Flicker	1
10.1.1 Lamp Flicker	1
10.1.2 Visual Adverse Effects	5
10.1.3 Neurophysiological Adverse Effects	11
10.1.4 One Tool to Specify the Risk of Flicker?	13
10.2 Optical Radiation Hazards.....	15
10.2.1 Photochemical and Thermal Damage	15
10.2.2 Blue Light Hazard.....	16
10.3 Adverse Effects of Light-at-Night.....	23
10.3.1 Circadian Disruption, Melatonin and Medical Disorders	23
10.3.2 Breast Cancer.....	24
Part II TECHNOLOGY	1
11 Lamps, Gear and Drivers	1
11.1 Introduction	2
11.2 Performance Characteristics.....	3
11.2.1 System Efficacy	5
11.2.2 Lifetime and Lumen Depreciation	5
11.3 Incandescent Lamps: GLS.....	12
11.3.1 Working Principle.....	12
11.3.2 Construction.....	13
11.3.3 Lamp Properties.....	13
11.4 Incandescent Lamps: Halogen.....	15
11.4.1 Working Principle.....	15
11.4.2 Construction.....	15
11.4.3 Lamp Properties.....	16
11.5 Gas Discharge lamps: Tubular Fluorescent.....	17
11.5.1 Working Principle.....	17
11.5.2 Construction.....	20
11.5.3 Lamp Properties.....	21
11.6 Gas Discharge Lamps: Compact Fluorescent.....	23
11.6.1 Working Principle.....	23
11.6.2 Construction.....	23
11.6.3 Lamp Properties.....	24
11.7 Gas Discharge Lamps: Induction	25
11.7.1 Working Principle.....	26
11.7.2 Construction.....	26
11.7.3 Lamp Properties.....	27
11.8 Gas Discharge Lamps: Compact Metal Halide	27
11.8.1 Working Principle.....	28

11.8.2 Construction.....	28
11.8.3 Lamp Properties.....	29
11.9 Control Gear for Gas-Discharge Lamps.....	31
11.9.1 Igniters.....	31
11.9.2 Ballasts.....	31
11.9.3 Dimmers.....	33
11.10 Solid State Lamps: LED.....	33
11.10.1 Working Principle.....	35
11.10.2 Construction and Manufacturing.....	40
11.10.3 Binning.....	47
11.10.4 Lamp Properties.....	47
11.11 Solid State Lamps: OLED.....	50
11.11.1 Working Principle.....	50
11.11.2 Construction.....	51
11.11.3 Lamp Properties.....	52
11.12 Drivers and Dimmers for LEDs and OLEDs.....	53
11.12.1 Drivers.....	53
11.12.2 Dimmers.....	54
12 Daylight.....	1
12.1 Introduction.....	1
12.2 Origin of Daylight.....	2
12.3 Properties of Exterior Daylight.....	3
12.3.1 Variability of Daylight.....	3
12.3.2 Daylight Levels.....	4
12.3.3 Spectrum and Colour.....	4
12.3.4 Sky Luminance.....	6
12.4 Properties of Daylight in Interiors.....	8
12.4.1 Interior Daylight Levels.....	8
12.4.2 Flow of Daylight.....	12
13 Luminaires.....	1
13.1 Photometrical characteristics.....	2
13.1.1 Light Distribution.....	2
13.1.2 Luminaire Efficiency and Utilisation Factors.....	7
13.1.3 Luminance Distribution.....	10
13.1.4 UGR Table.....	11
13.1.5 Shielding Angle.....	15
13.2 The Optical System.....	16
13.2.1 Mirrors.....	16
13.2.2 Prisms and Lenses.....	18
13.2.3 Total Internal Reflection (TIR) Optics.....	20
13.2.4 Diffusers, Louvres and Baffles.....	21
13.3 Thermal Characteristics.....	22
13.4 Lifetime and Lumen Maintenance.....	23
14 Connected Smart Lighting.....	1

14.1 Lighting Control.....	2
14.1.1 Switching and Dimming	2
14.1.2 Lighting Control Strategies.....	2
14.1.3 User Satisfaction.....	4
14.2 Smart Networks.....	7
14.2.1 Controller.....	7
14.2.2 Network Topologies	7
14.2.3 Wired and Wireless Transmission	9
14.2.4 Communication Protocols.....	9
14.3 Power over Ethernet (PoE).....	18
15 Light beyond Illumination	1
15.1 Smart Lights and Internet of Things.....	1
15.1.1 Internet of Things (IoT)	1
15.1.2 IoT Lighting System	3
15.1.3 Services of IoT Lighting Systems.....	5
15.2 Visible Light Communication, VLC	6
15.2.1 Principle of.....	6
15.2.2 Data Push Applications.....	10
15.2.3 Indoor Navigation.....	11
15.2.4 Light as Sensor	12
15.2.5 Li-Fi.....	13
Part III APPLICATION.....	1
16 Lighting Quality and Standards	1
16.1 Lighting Quality Parameters	1
16.1.1 Lighting level and Uniformity	3
16.1.2 Glare Restriction.....	5
16.1.3 Face Recognition and Modelling.....	5
16.1.4 Colour Appearance	6
16.2 Standards and Recommendations.....	8
16.2.1 ISO-CIE Standard.....	8
16.2.2 European Standard.....	9
16.2.3 North American Standard	15
17 Design Aspects	1
17.1 The Design Process	2
17.1.1 Analysis of the Lighting Function	2
17.1.2 Determination of Lighting Quality	3
17.1.3 Choice of Lighting and Control System	4
17.1.4 Choice of Lamp, Luminaire and Control Type.....	4
17.1.5 Determination of Number and Positions of Luminaires	4
17.2 Application Specific Aspects	5
17.2.1 Office Lighting	5
17.2.2 Industrial Lighting	9
17.2.3 Classroom Lighting	12
17.2.4 Lighting for Health Care Institutions.....	15

17.2.5 Emergency Lighting	19
18 Calculations and Measurements	1
18.1 Calculations	1
18.1.1 The Lumen Method	2
18.1.2 Computerised Calculations	2
18.2 Measurements.....	3
18.2.1 Light Detectors	3
18.2.2 Measuring Lamps	7
18.2.3 Measuring Luminaires	9
18.2.4 Measuring Lighting Installations	13
18.2.5 Light Logging Devices	15
 Appendix A.....	 1
Standardized Relative Spectral Sensitivity Values $V(\lambda)$	1
Appendix B.....	2
B1 Calculation of x-y Chromaticity Coordinates	2
B2. CIE Colour Matching Functions.....	3
Appendix C.....	6
RVP Model of Weston	6
Appendix D.....	7
RVP Model of Rea	7
Appendix E.....	9
$E_{\text{vector}}/E_{\text{scalar}}$ Ratio.....	9
Appendix F.....	11
Position Indices, p	11
Appendix G.....	12
Groningen Sleep Quality Scale	12
Appendix H.....	13
Normalised Formula for SVM	13
